## MINING, BUSINESS AND STOCKS

## THE BOSTON CON. GREATEST OF ALL

General Manager Newhouse Makes A Sensational Statement for Benefit of Stockholders.

#### WILL INCREASE MINE'S OUTPUT

Will Pay a Dividend of 8 Per Cent on \$100 Stock Within the Next Four Months.

After making an inspection of the Boston Consolidated, Samuel Newhouse gave out the statement below. That portion of his report in which he avers that "as soon as our rapidly maturing plans for the erection of mills the price of \$100 per share, shows the extent of the ore bodies and the wonderful system used for the economic handing of the output.

The report also shows that Bingham

is beyond all question the greatest copper camp in the country.

The statement follows:

"I knew that there had recently been some great developments in the Boston Consolidated," said Mr. Newhouse last night upon his return from the camp, "but I did not desire to make any announcement until I made a personal inspection. In the Feabody tunnel workings we have gone 51 feet into a workings we have gone 51 feet into a body of ore that will average 9 per cent copper. In the past six months in the two Ben Hur tunnels and the Montpeller tunnel we have opened not less than 35,000,000 tons on the porphyry side that will average 3 per cent copper. This is the information given to me directly by Manager L. C. Cates."

In view of the intense interest that has been aroused by the sudden rise in the shares of Boston Consolidated, which have in three weeks more than which have in three weeks more than doubled in price, and sold in Boston yesterday close to the \$18 mark, Mr. Newhouse last night issued the follow-

Newhouse last night issued the following signed statement both to the local and Eastern press:

"The rapid increase in the market price of the shares of the Boston Consolidated Mining company within the past few weeks may impel some of our shareholders to part with their holdings, I feel it my duty as presellent and general manager of the company to urge shareholders to retain their to urge shareholders to retain their shares even though the temptation to

"As soon as our rapidly-maturing plans for the erection of mills and the shipment of ores to the smelter now in Smelting and Refining company are perfected, I am confident that our company can earn an 8 per cent dividend on the shares at \$100.

on the shares at \$100.

"With the great extent of our copper-bearing porphyry deposits these dividends should, and I believe will, be paid for an indefinite period. Besides this great body of copper in the porphyry we have opened up ready for extraction a body of sulphide copper ore from which we are now shipping 250 tons per day and which will be increased to 750 tons when the new smelter is ready to receive it.

"The sulphide ore alone will yield a profit of \$150,000 per month when the new smelter is ready for operation, May 1. I, therefore, advise our shareholders to keep their shares as an investment rather than sell them now at a price less than their actual value.

a price less than their actual value. "SAMUEL NEWHOUSE."

#### A Lucky Salt Lake Woman.

There is a Salt Lake woman who has made a fortune in the far north. She is now in Salt Lake on a visit to her old home after spending several years in the Klondike country. Her name is Mrs. Nettle Taylor and she is the proprietess of the Nugget Roadhouse, a hotel on Blue Dominion creek. She not only has a fortune in her hastelry but is also the owner of a placer mine which is panning out finely in the yellow metal. With the placer mine she owns waterright and so is in an independent position.

#### Ore and Fullion.

The ore and bullion receipts as reported by McCornick & Co. yesterday totaled \$54,700, divided as follows: Gold, silver, lead and copper ores, \$22,-900; base bullion, \$31,800.

Miners are Exploiting the Great Porphyry Dyke, Meeting With Success

#### MANY SHIPMENTS ON ROAD.

Miners Are Scarce and Not an Idle Man is to be Found in the Country.

There is a great awakening in the old camp of Ploche, Nevada. Never since the old days when millions in ore were shipped from the diggings has there been such activity in the mines. From reports received today it seems certain that the camp will once more take on another lease of life and enter the lests of the big producers. The porphyry dyke, which runs through the country for miles and which was overlooked by the early miners, is now

being exploited and bids fair to be the

mother lode of many big mines. Many

of those located on the dyke have passed by the prospective stage and are about to enter the list of mines.

As in the old days it is Sait Lake men and Salt Lake capital which is men and Sait Lake capital which is opening up the properties. Of these the property of the Pioche, Nevada. Consolidated may be first mentioned. This mine is on the porphy dyke and has been developed by a shaft now down 117 feet. Drifts are now being made to go under the ore chute which crops on the surface. Fine ore has been encountered all the way down and also in the drift. A car load is now on the way to Salt Lake from the mine. This is being shipped as an experience to see the surface and periment to see its exact character and to demonstrate the feasibility of con-tinuous shipments. The West Yuha owned by McCune are shipping ore, the last car load of which netted \$5,000 per ton. The old Mindah mine is working a good force of men and is

The Stampeed Gap mine is still working and are now in a depth of 65 feet and are in a fine body of ore, assaying 53.7 per cent lead and 365 oz.

taking out a fine quality of lead-silver-

The Rives-Scott strike in the Jack Rabbit recently reported is still looking fine and they are now sacking a fine quality of silver-gold-lead ore. Some fine samples of silver lead ore reached the city this morning from the Little Mendah mine, which is an extension of Old Mendah. The shaft has gone down 75 feet on an incline and has followed all the way a body of rich sliver-lead ore which has averaged from one to two and a half feet in thickness This ore runs 40 per cent lead and carries an average of \$18 gold per ton.

There is a great scarcity of miners in the district; not one idle man can be found in that part of the country. Mine owners say that railroad or no railroad, and old camp will be heard from in the near future. OLD LATHAM DEVELOPMENTS

A New Smelter for the Ohio Lend Mining and Smelting Company. A new smelter for the Ohio Lead Mining and Smelting company is one of the things of the near future, ac-cording to Manager Geo. L. Moats, who returned from the east yesterday. Mr. Monts says that the management has Moats says that the management has determined to push development work at the Spruce Mountain mines and then rush in material for the smelter next spring. Speaking of the old Laham ground he says that it is developing into a mine of the bonanza sort, and shows any quantity of high grade lead-silver-copper ore.

The mine is close to the line of the proposed Western Pacific road and bids fair to be heard from in the near future. Mr. Moats leaves for the properties in a few days.

ties in a few days.

#### OUR TINITE BUDGET.

Old Camp Ships 128 Cars of Ore During

The Past Week. Special Correspondence.

Eureka, Nov. 4.—The hoist of the Eureka-Hill mine has been started up for the benefit of the leasers in that property on the lower levels and the shaft is being repaired. Now that the lower levels have been placed in working order the number of leasers will be increased, and many of them will make good money during the coming winter.

The Raymond mine, located just northwest of Eureka, has been connected by pipe line with the Eureka water system, and hereafter this property will receive its entire water supply from the source. Development work is being pushed in the drift on the 1.500 level and the showing is encouraging.

source. Detailing and the Louis pushed in the drift on the Louis pushed in the drift on the Louis and the showing is encouraging.

James A. O'Brien and H. Gustaldi, who have been working the Grant group of claims in East Tintic for the past three months, have a fine showing in the bottom of the shaft which they are sinking and feel greatly encouraged with the outlook of the property.

Supt. Jackson McCrystal and Machinist H. B. Benton of the Godiva mine left Thursday for Hailey, Ida., to remove the machinery of the mill at the Tip Top mine at that place to Eureka, where it will be placed in commission at the Godiva mine at this place to handle the low grade ores of that property, of which there is an unlimited quantity.

quantity.

The hoisting plant has been placed in working order at the New Utah property in West Tintic, and as soon as the new sinking pump arrives work will be started on the property. The property is owned by well known mining men of Utah and Colorado, and development work will be continued all win-

A fine body of ore has been opened tp in the Mammoth mine 100 feet above the 1,600 level, and the force has been necreased to work the new body. The output at the Gemini mine has been cut down one-half this week, and out one shift is at work, the night shift being laid off temporarily.

The miners of Tintic so far have been but slightly affected by the coke farming due to the fire at Sunnyalds.

famine due to the fire at Sunnyside. Some of the mines have received word to cut down their output of ore to the smelters, while the limit has been put on other mines of the district. The smaller mines and leasers will have no trouble in making shipments. The reason for the decrease in the output of the Centennial-Eureka mine this week was the inability to secure railroad cars to make shipments, but no

tile Rise in a Number of Southern Pacific Strike is One of Un-

pius of the Banks -- Prices Yielded and Closing Dull.

Manager Burnham of the Southern Pacific yesterday received samples from the new strike in that North Ogden budding bonanza. The cre is coapergold. The latter metal appears in quantities greater than was at first thought possible and is of greater money value than the copper though the red metal runs over 20 per cent.

Mr. Burnham says that the miners have penetrated the vein for 20 feet and though they are crosscutting the ledge there is yet no sight of a wall. From indications on the surface he thinks it will be several days before the wall of will be several days before the wall of the vein is encountered, which he trinks will be fully 20 feet fartner on. When Mr. Burnham was at the mine Tuesday, he stated that in the adjoining property owned by Don McGuire, that gentleman told him he was encountering better ore in the upper tunnel than in the one where the recent strike was CONCENTRATES.

Judge W. H. Dickson has gone to Tonopah and Bullfrog on legal mining

Manager Doolittle of the Bingham-New Haven will reach the city from New York tomorrow morning.

Manager Alexander has returned from the Black Diamond and reports that this mine is in a fine condition. Manager Rohlfing of the Frisco contact has returned from a trip of inspection of the mine and is much pleased with the outlook,

The Pioneer Sampler this morning reported three cars of Bingham ore, two from Alta, two from Tintle and one from Nevada.

The Taylor and Brunton sampler reported today four cars of Nevada ore, four from Bingham, five from Tintic and three from Idaho.

The report comes from Boston that F. A. Schirmer of Schirmer, Chaipin & Emmons, is on his way to Utah to inspect the Newhouse mines, in which he is interested.

A City is like a bank—its head should be solid, honest, firm, progressive. Who thinks of politics in choosing a bank president?—Adver-

#### BUSINESS NOTES.

There was a big spurt in sugar stocks, especially in Idaho, during the midle of the week. The stock transfer books opened on the 2nd after the payment of the dividend, and closed at noon today preliminary to the allotment of the \$500,000 new capital at par. The desire to "get in" on this allot-ment induced large transactions and quite a number of new stockholders were enrolled on the transfer books of the company, which will now remain closed till the 13th inst. The five hun-

closed till the 13th inst. The new hundred thousand dollars capital is payable on the 10th.

Other stocks in which there was considerable activity were Utah preferred, Con, Wagon & Machine Co., pfd, and Amalgamated preferred. Most of the others in the list were inactive.

Opening Prices Showed a Vola-The Specialties.

#### LIQUIDATION WAS VERY FREE.

Caused by Ten Million Cut in the Sur-

New York, Nov. 4 .- Opening prices in the stock market today showed a volatile rise in a number of specialties but the general list was irregular in sympathy with the tone of the London market, Railway Steel Spring was carried up 21/4 on large transactions. American Tobacco preferred opened 216 higher, Virginia Iron 11/2, Canadian Pacific Pa. Duluth, South Shore and Atlantic preferred a point and American Grass Twine and United Railway Investment large fractions.

Very litic improvement occurred in the best known stocks as a result of the sensational advances in numerous minor stocks. Reading made its customary flight to 130 but fell precipitately later to 136, when the entire market became weak. In the fight upwards, American Tobacco prothe fight upwards, American Tabacco preferred and Hocking Valley benefited to the extent of 3½. Cotton Oil 2½. Consoildated Gas 1½. United Railway Investment 1½. American Grass Twine 1½ and United States Pipe 1. Some of the important railroad stocas railed to a flaction over last right, but were driven lower afterwards. Delaware & Hudson yielded 2. General Electric 1½. Lead 1½ and the Smelting stocks Tennessee Coal, Locomotive, Duluth. South Shore and Atlantic preferred and Hocking Valley preferred. Prices moved uncertainly with a yielding tendency until the bank statement. The \$10,000,000 cut in the surplus of the banks, bringing that item below \$2,000,000, induced free liquidation all through the list. The loses ran to average of about a point. Reading fell 4 Central Railroad of New Jersey 5½. Northern Pacific. Duluth. South Shore & Atlantic preferred, Tennessee Coal, Smelting and Locomotive 2 to 2½. Union Pacific 1½, Brooklyn Tran sit 1½ and Lead 1½. The United States Steel stocks offered slight resistance and the fall in prices was checked, Prices yielded again and the closing was easy. Close: Money on call nominal, no loans. Time loans steady; 60 and 30 days, 4½.65 per cent; six months, 4½.65.

#### PRODUCE.

CHICAGO. CHICAGO.

Chicago Nov. 4.—Lower prices for wheat at Liverpool caused weaknoss today in the market for that grain here. Commission houses were the principal seliers. Demand was very light. May opened 140% to 147% lower at 89% 089%. and sold off to 89%. December opened 140% to 50% to 85%. Trading was dull the entire session and sentiment continued bearish. May sold at 89%, closing weak 15 lower at 89% 089%. December closed 140% at 88%.

December corn closed unchanged at 46. Onts was very dull. December opened 160% lower at 30, and sold at 30% 30%.

Provisions were a trifle easier on a very light demand. May pork was off 5 cents at 12.62%; lard was unchanged at 6.07%, and ribs were off 2140% cents at 6.7%.

6.97%, and ribs were off 24%6 cents at 6.70.

# TRADE CONDITIONS A LITTLE MIXED

Cooler Weather in Most Parts of Country Has Stimulated Retail Demand for Merchandise.

#### SOME IMPROVEMENT MADE.

Labor Controversies Have Not Much Disturbing Influence-Manufacturing Good.

New York, Nov. 3 .- Dun's Weekly Review of Trade tomorrow will say: Cooler weather in most sections of the country has stimulated retail demand for seasonable merchandise, improving the tone of business where there had been more or less irregularity, but reports are still somewhat mixed as to collections. There is still a very close conjections. There is still a very close comparison of ia, lway earnings, which were only 6 per cent larger than in October, 1904.

Industria, conditions are little disturbed by labor controversies, although several important questions are under discussion.

several important questions are under discussion. Thus far work is scarcely in a upted and more cases of advance in wages are reported. At the south and west scarcity of labor tetards operations, yet these sections are more prosperous than ever before.

Lending branches of manyfacture make good progress, most mills and factories having orders for more remote delivery than is customary, and especially favorable statements are made respecting lumber and flour mills. It is no longer cause for comment when It is no longer cause for comment when new records of output are established, as this has become the rule rather than the exception.

the exception.

Fallure returns were very favorable for October, liabilities falling 36 per cent behind last year's. For the first time in recent weeks exports from this port declined materially in comparison with the same week of 1904, the adverse balance amounting to \$4,843,103. Imports rose \$1,903,403. Finished steel business is still coming forward, a large tonnage of structural shapes now pending and the situation will find little relief in the starting of several new plants because their output has already been cause their output has already been sold far ahead, Forward business in hides during the

past week attained enormous propor-tions, transactions at Chicago and Missouri river points reaching fully 250,000

Failures this week in the United States are 202, against 220 last week, 233 the preceding week and 229 the corresponding week last year. Failures in Canada number 34, against 25 last week, 38 the preceding week and 27 last year.
